GHGA Consent Modules

GHGA has developed different modules that can be integrated into consent documents to inform research participants about sharing omics data with genome archives such as GHGA.

GHGA Legacy Consent Toolkit

Legacy consent may provide a way forward for researchers working with pre-GDPR consent forms, in particular for longitudinal or cohort-based studies. The GHGA Legacy Consent Toolkit guides researchers when assessing their pre-GDPR consent forms.

Information and documentation are available on [ghga.de](https://www.ghga.de).
