

Building our infrastructure with research and clinical communities in mind, GHGA is in close contact with omics data producers and users.

Webinars

Regular short online training courses on FAIR data sharing, sequencing techniques, statistical analysis, ethical and legal implications.

Lecture Series

"Advances in Data-Driven Biomedicine" - monthly virtual scientific talks on data-driven biomedicine with invited speakers.

Workshops

In-person events at conferences on FAIR data sharing and the ethical, legal and social implications.

Social Media

News, events and training materials are communicated on social media. With "Der Code des Lebens" GHGA also produces a podcast.

Visit ghga.de for more information on our activities and links to our social media channels.
